DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Figures 4-8 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art in view of Takahashi et al. (WO 02/103430: US 6,819,491 is relied upon as a translation of the WO document).

Applicant's admitted prior art discloses:

An optical pickup device for driving and controlling a lens holder holding an objective lens by using a moving coil method, and for adjusting an irradiation position of a laser beam on an optical disk by displacing the objective lens (page 2, line 20, to page 4, line 30),

wherein a cut-out portion is formed at a position closest to a rising mirror on an opening which is formed in the lens holder for holding the objective lens (page 4, lines 24-26).

Applicant's admitted prior art does not disclose that "a light shielding ring for sealing the cut-out portion is arranged to fix the objective lens."

Takahashi discloses a light shielding ring for sealing the outer periphery of an objective lens (column 17, lines 58-63). Takahashi discloses that this insures light only passes through optimal portions of the lens (column 18, lines 20-30).

It would have been obvious to one of ordinary skill in the art at the time of the invention to include in Applicant's admitted prior art that a light shielding ring for sealing the cut-out portion is arranged to fix the objective lens, as taught by Takahashi (Takahashi's light shielding ring, added to Applicant's admitted prior art, would inherently shield the cut-out portion).

The motivation would have been to only use the optimal portions of the lens, as taught by Takahashi.

Conclusion

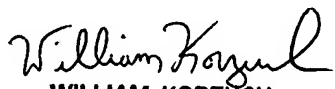

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Otsuki et al. (US 6,356,398) discloses adding a light shielding film on the outer edge of an objective lens.
